

Profits have not increased at Evanston Hospital

Revenue Decline

CMS Rating Impact (Primary Driver)

Patient Experience (HCAHPS)

- Poor doctor–patient communication
- Poor nurse responsiveness
- Cleanliness and hygiene perception
- Discharge communication issues

Clinical Outcomes

- Higher-than-average readmission rates
- Mortality rates not meeting benchmarks

Safety of Care

- Hospital-acquired infections
- Complication rates
- Patient safety indicators

Timeliness and Effectiveness of Care

- Delays in treatment
- Inefficient care coordination
- Emergency department wait times

Patient Choice and Market Dynamics

- Preference for higher-rated private hospitals
- Negative word-of-mouth and public reviews
- Decline in repeat and referral patients

Payer and Insurance Network Impact

- Preference for higher-rated hospitals by insurers
- Reduced inclusion in preferred provider networks
- Lower negotiated reimbursement volumes

Cost Increase

Capital Expenditure with Low ROI

- Investment in advanced medical equipment
- Specialized units (High-risk OB, Infant Care)
- Limited impact on CMS rating metrics

Workforce Costs

- Increased headcount
- Higher training and skill development expenses
- Overtime and staffing inefficiencies

Operational Inefficiencies

- Suboptimal resource utilization
- Process bottlenecks in patient flow
- High maintenance cost of underutilized assets
